

Virgin Islands Waste Management Authority
Job Vacancy Announcement

Wastewater Operator Class III
St. Croix (1)
St. Thomas (2)

SALARY: \$42,049.00

DEADLINE: July 6, 2018

Wastewater Treatment Plant Operator III – This is the advanced journey level class in Wastewater Treatment Plant Operator series. Positions at this level require demonstrated ability to perform the full range of wastewater treatment plant maintenance and repair duties as well as the full range of complex plant operations duties. Positions allocated to the Wastewater Treatment Plant Operator III level may act as Duty Operator. Positions designated as Duty Operator perform complex analysis of the Wastewater Treatment Plant operations and have direct charge of the operation of the wastewater treatment facility. Positions at this level may provide instruction and assistance to lower level Wastewater Treatment Plant Operators.

DUTIES AND RESPONSIBILITIES:

Include the following with other duties as assigned.

- Performs the full range of duties related to plant operations; operates a variety of facilities, systems, equipment, pumps, and valves; learns to operate and maintain new systems and equipment as necessary.
- Performs a variety of equipment maintenance duties; inspects, removes, cleans, lubricates, backwashes, repairs, maintains, and reinstalls equipment related to a variety of wastewater treatment plant facilities, systems, grinders, drip traps, scales, centrifuges, hydrovanes, tanks, pumps, valves, and piping systems; cleans and calibrates meters and probes; performs general housekeeping of all areas associated with assigned facilities.
- Performs a variety of process control related duties; collects samples from various plant processes for chemical/biological analysis; operates and calibrates automatic samplers; collects storm channel water samples outside the plant as necessary; performs a variety of tests and analysis; measures primary and secondary settling basins sludge depths; performs mathematical calculations including those related to flows, areas, volume, weight, force, pressure, chemical dosage, and those related to various tests and analysis; evaluates laboratory testing results and calculations and implements results in operational control.

- Investigates and acknowledges alarms throughout the wastewater treatment facility; monitors, polls, and responds to lift station alarms; locates and notifies stand-by personnel to respond to lift station alarms; provides support, security, and communication to maintenance personnel at lift stations when responding to alarms.
- Monitors and maintains leak detection system.
- Performs a variety of recordkeeping duties; creates new log books and properly stores old records and log books; ensure NPDES permits are properly maintained and available; tracks status of Advanced Maintenance Management System (AMMS) request; maintains Material Safety Data Sheet (MSDS) records; complete, maintains, and files a variety of forms, lists, records, schedules, and informational logs; maintains and updates equipment status board; maintains and updates daily readings on process control board.
- Performs a variety of duties in response to power outages emergencies; operates, monitors, and adjusts, and maintains backup generators; respond to power outages by properly resetting, restarting and bringing systems essential to proper plant operations back on-line; maintains proper fuel levels in generators and storage tanks.
- Performs a variety of duties in response to wet weather emergencies; operates, monitors, and adjust plant drainage system: places sand bags around excess storage pond perimeter; stages, operates, monitors, and lubricates emergency trash pumps.
- Performs a variety of public relations related duties; conducts tours and provides educational information; receives, investigates, documents, and responds to odor complaints; receives telephone inquiries from the public; answers questions and directs inquiries to appropriate personnel as necessary.
- Participates in a variety of training activities; studies equipment manuals for all facility equipment; receives training on new equipment and processes as well as initial and periodic refresher training on processes, procedures, systems, and equipment related to assignment; maintains familiarity with all standard operating procedures pertaining to equipment and plant processes; may provide training to new operators-in-training on equipment and plant processes.
- Performs and participates in a variety of safety related duties and activities; follows all safety standard operating procedures when performing work; maintains awareness of and reports/corrects any trip hazards, spills, and unsafe equipment; properly handles, stores, and labels various chemicals; maintains familiarity with the Chemical Spill Response Plan; maintains familiarity with lift station spill procedures and responses; inspects, cleans, and maintains eye-wash stations; maintains and inspects all personal protective equipment and restocks as necessary; maintains and updates MSDS catalog; maintains proper facility lighting; performs proper lock-out/tag-out procedures; secures facility perimeter and ensures buildings and vehicles are secure.
- Operates a light truck in and out of plant.
- Operates tractor, forklift or other vehicles/carts inside the plant grounds as required.
- Performs related duties as required.

EDUCATION AND EXPERIENCE:

- Equivalent to the completion of the twelfth (12th) grade supplemented by college level course work or trade school training in wastewater treatment technology.
- Two years of experience comparable to a Wastewater Treatment Plant Operator II with the Authority.
- Possession of a Grade III Wastewater Treatment Plant Operator Certificate and a valid V.I. Class E driver's license.
